

ENVIRONMENTAL SERVICES AND SOLUTIONS

4-RAIL Services can assist clients in complying with the requirements of COSHH (Control of Substances Hazardous to Health Regulations 2002 as amended). Our experienced and technically qualified staff; surveyors, site technologists and consultants, offer a full range of environmental services and on site monitoring such as:

- **Monitoring workplace exposure** against HSE Workplace Exposure Limits (WELs, EH40)
 - Airborne **Dust** levels (Respirable and Total Inhalable)
 - Airborne **Silica**, released during building works / demolition
 - **Fumes**, generated during welding, soldering, etc.
 - **Organic solvents**, e.g. isocyanates, VOCs etc. released when using hazardous substances such as paints, cleaning agents, setting resins, chemical admixtures, etc.
 - **Toxic and flammable gases** produced by solvents, catalysts, chemical reactions, etc.
 - **Diesel emissions** e.g. when using diesel engine plant in confined spaces such as tunnels
 - Airborne **Microbiological Organisms**, e.g. yeasts and moulds
 - Conducting on site **investigations** which can include static, process/task specific & personal monitoring
 - And other such similar hazards to those listed above
- **COSHH assessments** of hazardous substances used within client specific processes
- **Hazardous Material Surveys, including Identification and Quantification**
 - Analysis of coatings for **Lead** and **Chromium** content
 - Bulk sampling for **Asbestos**
 - Sampling of plaster for **Anthrax**
 - Identification of **Poly Chlorinated Biphenyls (PCBs)** and hazards
 - Identification of **biological hazards**
- **Contaminated Land** (*including track ballast*), **Water and Effluent analysis**
 - Desk top studies
 - **On site surveying and sampling**, *including regular,/periodic monitoring exercises*
 - In house testing and analysis
 - Identification of **biological hazards**
 - Interpretation of results
 - **And many other similar services**
